

OBI BOWLING LAUNCHER

Hi folks,

I was approached recently by a few people regarding my use of the Obi bowling Launcher.

The launcher was created to assist people deliver bowls that may have knee, hip or back issues. I have been using the launcher for the last 2 years and it has certainly helped my knees and my score ha ha ha. I was wondering if anyone would like me to provide a demo and lesson with tips about using the launcher device. I understand that the club has 6 launchers available that may be borrowed to give it a try.

I will be staying after Sunday Cutthroat around noon on June 9th if anyone would like a quick demo/lesson.

Please let me know if you would be interested at palliser@email.com . I could also arrange another time if Sunday would not work.

All the best,

John
